

KUROKO G-A-2: May 16 Primary Artifact Verification Report

(REVISED — Audit Corrections Applied)

Investigation ID:	KUROKO-GA2-MAY16-20260907-REV1
Investigation Date:	2026-09-07 (Revised)
Primary Artifact:	TODO_147 (Relay Project)
Artifact Creation:	2026-05-16T10:20:27.298613
Status:	SUBSTANTIALLY ACCEPTED / REVISION REQUIRED

Audit Corrections Applied

Item 4 (LB_001): Reclassified from STRONGLY_SUPPORTED to NOT_FOUND (May 31 evidence cannot retroactively establish May 16 existence)

Item 6 (Source/Inheritance): Split into independent implementation CONFIRMED and prior inheritance UNKNOWN

Temporal Separation: Strict enforcement of May 16 vs May 31 evidence distinction

Corrected Six-Item May 16 Verification Matrix

Item	Classification	Confidence	Key Finding
1. Relay Existence	CONFIRMED	HIGH	TODO_147 timestamp
2. Handoff Concept	CONFIRMED	HIGH	Design specified May 16
3. Logbook Concept	UNKNOWN	MEDIUM	No May 16 evidence
4. LB_001 (REVISED)	NOT FOUND	HIGH	No May 16 evidence; operational by May 31
5. Predecessor System	NOT_FOUND_IN_EXAMINED_EVIDENCE	MEDIUM	Scope-limited absence
6A. Independent Implementation	CONFIRMED	HIGH	Separate codebase stated
6B. Prior Inheritance	UNKNOWN	N/A	Absence ≠ proof

Critical Temporal Distinction Enforced

EXISTED ON MAY 16 ≠ FIRST OBSERVED ON MAY 31 ≠ FIRST CREATED

Item 4 Corrected: LB_001 NOT FOUND on May 16. LB_001 CONFIRMED operational by May 31. Do NOT project May 31 evidence backward to May 16. First observed ≠ first created.

UNKNOWN Status Preserved

The following remain UNKNOWN and cannot be resolved by narrative inference: LB_* naming origin, logbook concept origin, LB_001 creation date, prior-product inheritance, ultimate source.

Audit Status

G-A-2: SUBSTANTIALLY ACCEPTED / REVISION REQUIRED

G-A-3: NOT YET AUTHORIZED (pending G-A-2 acceptance)

Awaiting: Final audit judgment from ■■■■■■
